

DEFINITIVE MAP - KEY

20 Individual 1:10000 Ordnance Survey Maps collectively cover the Metropolitan Borough of Solihull, each has an accompanying Written Statement describing the routes on that particular map.

1. Each footpath or bridleway is identified by a reference containing letters and digits, for example - **SL95** and **M135**.

The letter(s) refer to the former Urban or Rural District Area in which the routes lay when the original Definitive Maps were published in the 1960s ie **M** for the former Rural District of Meriden and **SL** for the former Solihull Borough. These letter(s) do not now have any special significance.

The digits represent the number of the route within that district. Some paths with several branches may be numbered M135A, M135B etc. Despite the suffix, each one is a separate route.

The Urban footpaths within the excluded area of the former Solihull Borough have also been investigated and are now incorporated in this revision of the Definitive Map. These paths have been prefixed by the letter **U**.

2. Legal Orders can create, extinguish, divert, upgrade or downgrade routes, partially or completely. Each order or legal event which has altered a route on the Definitive Map can be identified by the footpath reference, the initial letters of the Order and its date.

The complete wording of the orders or legal events are listed in Part Ic. These are held by the Department of Technical Services, Council House, Solihull and may be seen during working hours, should you wish to query.

3. The **Written Statement** is in 20 sections, one for each sheet of the Definitive Map. Each section relates only to those routes shown on its accompanying map. Where a path crosses onto an adjacent map, the statement will only describe as far as the map edge. The remainder of the route will be described in the Statement for the adjoining map.

4. The information listed on the Written Statement for each route is:-

- (a) The path reference ie M135.
- (b) The status of each route ie footpath or bridleway.
- (c) The approximate length of the route on the sheet.
- (d) A six figure Grid Reference to locate the start and finish points of the routes.
- (e) A description of the start and finish points ie road number and name.
- (f) The connections that the route makes with other Public Rights of Way or Highways (**NB** Road numbers have a single prefix - A, B, C, D or E).
- (g) Details of the surface type and width of the path where specified.

M4

Footpath	Length: 50 metres
Grass track	
FROM:	150900 Sheet SP19SW
TO:	150900 Continues on sheet SP18NE
Connects with:	None

M46
